

Assignment 1

- Refresh your memory on the Processes of Scrum, XP and DSDM (comprising Work Units, Products, and Roles), and answer the following questions:
 1. What are the seven activities of Scrum? How are these performed in XP? Discuss the superiorities of each methodology to the other as to the work units performed.
 2. For each of the products produced in DSDM, name its counterpart(s) in XP. Discuss the superiorities of each methodology to the other as to the artifacts produced.
 3. For each of the roles involved in DSDM, name its counterpart(s) in XP. Discuss the superiorities of each methodology to the other as to the roles involved.
 4. How is review & revision performed on the plan, product and process in each of these three methodologies?
