

Assignment 1

1. Conduct a research on “Event Storming”, a method for problem domain exploration that is gaining widespread acclaim in the agile community. Prepare a report on how the method is applied, its capabilities and limitations, and the roles involved.
2. Answer the following questions:
 - Which of the principles of DSDM can be promoted through applying Event Storming?
 - Which of the ISFs of DSDM can be promoted through applying Event Storming?
 - Where in the DSDM process can Event Storming be applied? How can its results be used?
 - Compare the roles involved in Event Storming with those involved in DSDM.
