Assignment 3

Separately compare the AUP methodology with the following methodologies: DAD, XP, and Crystal Clear. In each comparison, specify the similarities and differences, and point out the aspects in which one process is superior to the other.

Extend DSDM into a feature-driven methodology by injecting (incorporating) relevant FDD activities into its process. Analyze the resulting feature-driven DSDM based on the analysis criteria introduced in Lecture 1, and specify its strengths and weaknesses in comparison with the original DSDM.
