SDM Research Topics
Fall 2010 (1-89-90)

- Topics highlighted in blue can potentially lead to novel results. Resulting high-quality papers will be earmarked for submission to international conferences.
- The number in parentheses shows the default size of the research team for each topic.

2. PSP/TSP: A Survey of the Status Quo (2)
3. Software Process Evolution: A Survey (2)
4. Tool Support for Process Engineering: A Comprehensive Survey of the Status Quo (2)
5. Lean Software Development Methodologies: A Survey (1)
7. Methodologies for Developing Embedded Systems: A Survey and Analysis (2)
8. Agile Agent-Oriented Methodologies: A Survey and Analysis (2)
10. Applying Service-Oriented Approaches to Situational Method Engineering: A Survey and Analysis (2)
12. Software Process Metamodels: A Survey and Analysis (1)
