

Assignment 2

- Refresh your memory on the Processes of DSDM and Scrum (comprising Work Units, Products, and Roles), and answer the following questions:
 1. What are the seven activities of Scrum? How are these performed in DSDM? Discuss the superiorities of each methodology to the other as to the work units performed.
 2. For each of the three artifacts produced in Scrum, name its counterpart(s) in DSDM. Discuss the superiorities of each methodology to the other as to the artifacts produced.
 3. For each of the three roles involved in Scrum, name its counterpart(s) in DSDM. Discuss the superiorities of each methodology to the other as to the roles involved.
 4. How are the two processes configured/reconfigured to fit evolving project situations?
